

ALEK RAIL

INFRASTRUCTURE SERVICES LIMITED

Railway Infrastructure | Engineering | Maintenance | Technical Consultancy

Company Overview

Alek Rail & Infrastructure Services Limited is structured to support railway asset owners, public-sector clients, contractors and specialist delivery partners with practical rail infrastructure engineering, maintenance, inspection, safety-led delivery and technical consultancy across West Africa.

Core Services

Permanent Way Maintenance	Track maintenance support, defect response, rail and component work, workbank delivery support.
Track Inspection	Condition inspection support, defect identification, evidence capture and technical reporting.
Switches & Crossings	Inspection and maintenance support for S&C assets and associated components.
Maintenance Planning	Workbank development, prioritisation, resource planning and execution support.
Safety & Quality	Safety-led planning, site coordination, assurance, documentation and quality controls.
Technical Consultancy	Practical engineering input, project interfaces, reporting and delivery-partner support.

Delivery Capabilities

Asset condition and defects; maintenance planning; project interfaces; site delivery; technical reporting; partner mobilisation; inspection support; evidence capture; defect registers; worksite coordination; engineering management interfaces; tender and project support.

Operating Focus

Nigeria, Liberia and wider West Africa. Alek Rail is positioned to collaborate with ministries, railway authorities, operators, EPC contractors, infrastructure investors and specialist engineering partners.

Engagement Model

Alek Rail can support assignments as a local delivery partner, technical consultant, maintenance-support provider, inspection-support resource or specialist subcontractor. Project-specific capability, resources and commercial terms are agreed for each engagement.
